ABOUT ME

.NET Developer with experience in desktop and web applications, database integration, and automations that optimize processes. I focus on practical solutions, performance, and efficiency. Driven by continuous learning, problem-solving, and delivering tangible results. I tackle challenges with proactivity and commitment, always seeking to transform ideas into useful and scalable solutions.

WORK EXPERIENCE

- SOFTWARE DEVELOPER

LG Lugar De Gente, Goiânia

JUN - 2024
PRESENT
- Full-Stack Developer focused on Vue.js, working on continuous improvement of team productivity. Noted for proactivity, technical leadership, and creating automations that optimize workflow. Participant in both editions of the internal Hackathon at LG lugar de gente, recognized as one of the most impactful developers.
- SOFTWARE DEVELOPER TRAINEE

LG Lugar De Gente, Goiânia

APR - 2023
JUN - 2024
- Key developer in the Gen.te Acompanha OKR project, focusing on continuous improvements in the front-end with Vue.js and back-end in .NET. Involved in the entire development cycle, from conception to delivery of features, applying best practices and contributing to the evolution of the solution.
- SOFTWARE DEVELOPMENT INTERN

LG Lugar De Gente

JAN - 2022
SEP - 2023
- Worked on continuous improvement of the Gen.te Suite systems, focusing on performance optimization and efficiency. Conducted corrective maintenance that increased application reliability and contributed with clear technical documentation, facilitating support and maintenance. Developed and executed tests to ensure the quality of delivered solutions and suggested improvements focused on adding value to the products and services offered.
- FULL-STACK DEVELOPER

Meta Tecnologia Da Informacao · Full-Time, Goiânia

MAY - 2021
JUN - 2022
- Responsible for the full development of the HUBJet administration platform and corresponding APIs, using Java Spring Boot to build robust and scalable back-end services. Additionally, developed dynamic interfaces in Angular, enhancing user experience, and implemented solutions with MongoDB to optimize data storage and retrieval. Collaborated closely with multidisciplinary teams, ensuring integration and high performance of systems.

SOFT SKILLS

- Analytical ability and focus on practical solutions.
- Proactivity and autonomy in task execution.
- Clear communication in technical and multidisciplinary contexts.
- Teamwork with empathy and cooperation.
- Agility in learning new technologies.
- Organization and focus on continuous process improvement.
